

We're Hiring!

NEW PRODUCT INTRODUCTION LEADER

Location: Poland / on-site or hybrid work, with travel as required for project delivery

Reports to: R&D & NPI Director

Role Purpose:

Independently manage assigned NPI (New Product Introduction) projects from concept through to the launch of serial production, while supporting production and technical functions during implementation and after product launch. Responsible for coordinating activities, resolving issues, and ensuring a stable launch and the product's continued development.

What the role will focus on:

Leading New Product Introduction (NPI) projects from concept to serial production, coordinating Engineering, Quality, Operations, Supply Chain and other teams. The role will focus on planning, trials, validation, launch, solving technical/quality issues and ensuring a stable production start.

What we are looking for :

- manufacturing and NPI project experience
- knowledge of plastics processing technologies, particularly IM, ISBM, and EBM.
- strong project coordination, planning and problem-solving skills
- ability to work effectively across functions
- good communicative English
- experience with production trials, validation, customers/suppliers and Lean/Continuous Improvement.
